

# ALUMNI NEWSLETTER

---

No. 5

August 1979

---

Our Briggs Alumni Newsletter is the one opportunity we have to communicate with all alumni and alumnae of Lyman Briggs College, and I want to begin by thanking those of you who have let us know where you are now and what you are doing through your return of the recent alumni questionnaire. We really look forward to hearing news of Briggs' graduates, and we like to feel that a continuing relationship with Lyman Briggs College on the part of each individual who has been here is one of the goals we ought to strive for. So if you have not yet had a chance to complete and return the questionnaire, please let us hear from you!

As the Dean of Lyman Briggs College I am happy to report that your College has continued its active academic and community life throughout the past year. This is in large measure due to the energetic and productive contributions of our faculty, staff, and students working together in committees as well as in classrooms and laboratories. A tremendous amount of help and cooperation from the whole Briggs community has been generously given to me, and I very much appreciate it. Learning is an experience that grows as a result of the efforts of many people dedicated to the College. We are still striving for improvement along both academic and co-curricular dimensions, and I hope we always will be.

Eight hundred and twenty individuals have now been awarded Bachelor of Science degrees to date upon recommendation of Lyman Briggs College. So you see that Briggs alumni now form a sizeable group. They are working or studying all over the nation, and some are currently abroad. We started last fall term with 289 new freshmen. The total roster for the College last year numbered 840. We have now reached the approximate level of enrollment that we hope to stabilize as appropriate to the special character of our residential college. The precise level at which that stabilization should take place is partly a subjective question possessing many qualitative facets. Subtle issues of individual values and preferences intersect questions of resource allocation. Objectivity requires that basic information relating to benefits and economic factors will also continue to play an important role in determining policy regarding the size of the College. With the expectation of declining enrollments nationally, we need to do everything possible to keep enrollments in Lyman Briggs College at an economically viable level, and at the same time retain its residential college character. And you who are now Briggs College alumni/alumnae help us most importantly in this regard by vigorously letting people and prospective students know of your College and its unique program, whenever it is appropriate to do so. Additionally, you may find that your unique perspective as an alumnus/alumna of Briggs provides you with the opportunity to communicate in writing to appropriate officers of the University and members of the State Legislature in order to fully articulate what your education in our College has personally meant to you and your career.

This past year has been one of continuing change and activity for Briggs faculty and staff. Dr. Jane E. Elliott, who retired from the Assistant Deanship of Lyman Briggs College in June of 1977, has continued to serve the College as a treasured

consultant and student adviser during the 1978-79 academic year. Ms. Kathy Brown continues to serve as secretary to Assistant Dean Dr. Charles S. Scarborough. The Student Affairs Staff in Briggs during the coming year will be headed by Mr. Tim Pierson, Director of Student Affairs, who served as Associate Director of Student Affairs in 1978-79. Mrs. Sandra Conner will continue her fine work as Coordinator of Advisement in Lyman Briggs College. Mrs. Gloria Page will begin her second year as instructor in computer science, and Dr. Marvin Tomber will again join our mathematics staff. Professor Leonard Isaacs has joined our science studies staff to teach bioethics and topics in the history and philosophy of science and medicine. And several new senior seminar instructors from outside the College have brought exciting new opportunities for joint inquiry with mentors having long experience in public life working with policy problems having scientific dimensions.

Professors Robert Snow and David Wright have completed and published several additional articles in their continuing series on technology and popular culture. They are completing a book on technology and the American experience based on their research and teaching of the past several years. Together with Professor James McClintock they made well received public presentations this spring at an all-university conference on The Humanities and Technology, sponsored by the Michigan Council on the Humanities. Professor Mimi Sayed has been awarded an academic Administrative Internship for 1979-80 in the Office of the Provost, and her teaching duties in Briggs biology next year will be ably fulfilled by Dr. Jean Enochs, whom we were fortunate to attract for a year from the Science and Mathematics Teaching Center at Michigan State University. We will continue to benefit from physics laboratory instruction provided by Dr. Peter Schroeder, who will be joined next academic year by Drs. Horace Ma and Edwin Kashy, both professors in the Physics Department of the University.

This past spring a new student award was established in Lyman Briggs College, the Dean's Award for Academic Excellence. It is intended to honor separately a Briggs student whose academic distinction is to be recognized on its own merits. The F. B. Dutton Award has come to be recognized as honoring a student whose leadership and community building skills have played a central role in undergraduate life.

We continue to prepare vigorously for the new forthcoming flexibility at MSU in general education requirements. We anticipate that several of our Third Culture Rhetoric courses, Modern Fiction course, and Drama and Poetry courses as well as science studies courses will be of considerable interest to a wider segment of the Michigan State University student community seeking to broaden its opportunities in general education.

I want to thank all of you for helping to make Lyman Briggs College the lively focus of thought and activity that it is today. The life of a college is an exceedingly complex process, but one thing remains constant, and that is the importance of the individual and his or her development. We have all contributed to this process and those who remain as faculty and staff are grateful to you for your present interest in Lyman Briggs College.

Sincerely yours,

*Michael J. Harrison*

Michael J. Harrison  
Dean, Lyman Briggs College

ALIX, Pierre J. (1975)  
4262 Norman Dr. S.E.  
Grand Rapids, MI 49508

After having obtained my MBA in HRI from MSU on 6/10/78, I joined Red Lobster and became a Manager Trainee on 10/9/78. I became an Assistant Manager on 1/8/79 and worked at the South Cedar St. Lansing Restaurant until 6/25/79 whereupon I was promoted to an Associated Manager and transferred to Grand Rapids. I plan on becoming a General Manager within the next year.

AMISH, Nannette Andrews (1974)  
253 Whims Lane  
Rochester, MI 48063

I am working as an "independent" Insurance agent providing insurance (life, health, business) that Uncle Sam has almost required by his recent confiscatory tax law (estate) changes. It's a challenging field combining, as LBC would approve-- technical expertise with an interdisciplinary personal contact approach. I'm also working on a Master of Business Administration at U. of M. I have met several Briggs Alumni as clients in my work. (Any of you with questions in this area, feel free to ask, without obligation of course!)

ANDRIES, Kathleen M. (1971)  
752 Greenhills  
Ann Arbor, MI 48105

This was a big year of adjustment for me. I finally "put up my shingle" and have been in private medical practice since August 1978. I successfully passed the Board of Internal Medicine Exam. My new condominium is ideal for my lifestyle, allowing me freedom from drudgery of lawn work so I can ride my bike, play tennis and travel in what little spare time I have.

ASCHOM, Kenneth A. (1976)  
4029 North Bartlett Ave.  
Shorewood, Wisconsin 53211

It has been a busy year for us. We survived a record-setting cold and snowy winter in Milwaukee. I am still with the First Wisconsin National Bank of Milwaukee and have finished their Management Training program. I work in the Portfolio and Money Management Division where I trade Government Securities and other money market instruments, for correspondent bank portfolios. Sue spent ten months working for a Savings and Loan Association and has recently switched jobs and now heads up a Legal Administrative staff specializing in insurance and pension plans. We will be spending our vacation on a houseboat cruising the Mississippi River--if gasoline is available. Best wishes to all in the coming year.

AUSTIN, Mary M. (Scomazzon) (1974)  
2014 Fox Hill Dr.  
Sterling Heights, MI 48077

The last year has brought many changes into my life. My husband and I have completed the building  
(continued)

of our new home and the birth of our daughter, Christina came very shortly thereafter. I am still pursuing my career and currently am responsible for the nutritional care of approximately 85 hemo-dialysis patients at a satellite dialysis center.

BAKER, Pamela J. (1972)  
1900 Lyttonsville Rd. #1103  
Silver Spring, Maryland 20910

After finishing my Ph.D., I have continued to work in the Department of Physiology and Biophysics at Georgetown University. As a research associate, I am investigating the vascular responses to pharmacologic administration of several vasoactive agents, including prostaglandins and related compounds. Also, I have maintained my interest in teaching through involvement with the Nursing basic science curriculum; anatomy, physiology and microbiology for first and third year students. I really enjoy living in the D.C. area and during the coming year will be seeking an academic and/or government position in Washington.

BAKST, Barry (1978)  
16300 North Park Drive Apt. 211  
Southfield, MI 48075

After graduation from MSU, I spent the summer travelling through Europe. In September, I moved to Philadelphia and began school at Philadelphia College of Osteopathic Medicine.

BANDROFCHAK, Jan (1973) (Husband is Cleve Sharp)  
11 George Finnerty Rd.  
Barrington, Rhode Island 02806

I'm spending the summer (and probably the fall) working on my research in microbiology for my master's degree at Rhode Island College. Regardless of when I finish, I'm going to be working for the College in the fall as a part-time instructor. Cleve and I are spending most of the summer close to home. However, we're going to spend a week in Maine and will go white-water rafting in August. That excitement should balance out the rest of the summer.

BARCH, Karen Martin (1976)  
931 Dunlop  
Forest Park, Illinois 60130

After completing my MBA degree in August, I'll be moving with my husband to Chicago. I'll be working for Singer's Controls Division as a Staff Industrial Engineer.

BARKER, Diane S. (1979)  
315 Dimmick St.  
Owosso, MI 48867

I am planning to work for the University and continue my education toward a business orientation (i.e. management).

BARNES, Michael A. (1973)  
4030 S. Ross  
Idaho Falls, ID 83401

I plan to increase my sales to a level that surpasses the old standard of sales excellence. I  
(continued)

plan to sell over \$3 million in insurance next year, as I have written over one and one-half million so far this year.

BARSON, Thomas R. (1977)  
405 N.E. 13th  
Oklahoma City, Oklahoma 73104

I've been attending the University of Oklahoma studying medicine. I've just completed my basic sciences years and am looking forward to two years of clinical training. Most of my clinical experiences will be at the O.U. Health Services Center in Oklahoma City, with various rural general care and off-campus specialty experiences.

BAYN, Robert L. (1972)  
337 N. 100 West  
Logan, UT 84321

Kathy, Billy and I are still at Utah State University in Logan. I am a half-hearted part-time Ph.D. student in biology and full-time research technician-computer jock. Kathy is a secretary in Environmental Engineering and a Tupperware salesperson. Billy is supporting our favorite pediatrician with ear infections and healthy things like broken legs. If you can get gas, come see us.

BELL, Thomas R. (1975)  
6426 Jackson St.  
Pittsburgh, PA 15206

Dear Friends: Life continues to treat Carol and I very well. Our home has been healthy, work has been interesting, and the future bears promise. Carol's classes teaching English as a second language at Point Park College are the source of unending stories. My work at CONSAD has included a couple trips to Europe, giving me the chance to look up friends from Peace Corps days. If you're ever breezing through the Steel City, check the phone book under T. Bell.

BENSON, Paul (1975)  
27321 Dequindre #35  
Madison Hts, MI 48071

I am currently doing a family practice residency at Martin Place Hospital in Madison Heights, Mich. I have no definite plans on where I will practice although the possibility of returning the East Lansing area seems promising.

BERTINUSON, Anne (1978)  
227 Melrose Rd.  
Melrose, CT 06049

Since graduating from LBC in the Spring of 1978, I have ridden a Greyhound bus cross-country (and back again), hiked the Grand Canyon, washed dishes in a Berkeley cafe, and survived the coldest winter in Wisconsin's history. I am now working full-time as a waitress and taking one class at the University of Wisconsin-Madison, preparatory to starting graduate school in Bacteriology here in the Fall.

BLACKMORE, Mark S. (1978)  
200 Oak Wood Drive  
Enterprise, AL 36330

In the past year I have been doing graduate work at Auburn University and am currently engaged in research on the Behavioral Mechanisms of Dispersal of Young in Small Mammal Populations. Except for a trip to Germany and Austria in August, I plan to be at Auburn through the coming year.

BLITZ, Bethany (Schulz) (1978)  
4607 E. Tudor Rd.  
Anchorage, AK 99507

After graduation, I traveled last summer. Returning to Michigan to job hunt when all I have is a B.S. in B.S. was frustrating. I took a job in a small factory and started saving towards a Big move. When my long-time companion thought he'd like to come along to Alaska with me, we decided to get married, too. Drove the Alaska Highway in a '73 Datsun and lived. Government jobs in Biology are more plentiful here than in Michigan, but there are still waiting lists. Plan on attending the U. of Alaska in the fall and eventually earn an M.S. in Environmental Quality Sciences.

BLOOMFIELD, Michael (1975)  
14128 Superior Rd. #201  
E. Cleveland, Ohio 44118

For the year since the last newsletter I've been out of school working odd jobs and relaxing. Fell in love with Shelley Costa and married her in February. This has been the best year of my life. Baby due in November. Third year of Medical School starts in June.

BOSELLI, Thomas Stephen (1978)  
63 Birch Ave. Box 343A RD#2  
Absecon, N.J. 08201

For the past year I have been here at National College of Chiropractic completing my first year of a five-year program. I'm working as a bartender part-time, which gives me some social interaction and a change of pace. I plan to go to school for five straight semesters; then take next summer off and backpack it around Europe, with an emphasis on Germany.

BOSWELL, Jeffrey M. (1978)  
c/o Office of Student Affairs Baylor College of Med.  
1200 Moursund; Texas Medical Center  
Houston, Texas 77030

During the past year I have completed the Basic Sciences here at Baylor and am now a member of the Clinical Sciences class, and will begin 2 to 3 years of clinical work in September. Before gasoline got scarce I was able to spend my between terms vacations travelling, visiting Minnesota and Colorado. This past Spring I spent a week and a half backpacking in Big Bend National Park in West Texas, and also manage to hit the beaches along the Gulf Coast when my tan starts to fade.

BOYCE, James E., Jr. (1973)  
54 N. Main St.  
Lumberton, N.J. 08048

Since last October, I now have two children-- a girl and a boy--the two best kids (and wife) a man could have. Along with my normal school duties, I especially enjoyed teaching some courses on the scientific evidence in support of special creation (and against evolution!).

BRAZEE, Jason H. (1973)  
P.O. Box 3522  
Kingsport, Tenn. 37664

I will finish Internal Medicine residency at East Tennessee State University by December 1979, then plan to open a private practice office in Gaffney, South Carolina by January 1, 1980. My M.D. degree (MSU 1976) is finally about to pay off!!

BRIODY, John P. (1973)  
524 Tobin Apt. 309  
Inkster, MI 48141

Graduated from Wayne State in June 1978 with an M.D. degree. Currently at Oakwood Hospital in Dearborn, Michigan as a second year OB/GYN resident. Still plan to practice in a rural community in Northern Michigan.

BUHRMASTER, Wendy (1978)  
207 Bogue St.  
East Lansing, MI 48823

I have been taking a vacation from set learning programs by devoting my time to the equine species. Currently I am training in long distance riding and plan to complete my year off by a late fall to winter expedition on horseback. Extended plans are for me to return to school next year.

BURGIS, Kathy (1975)  
721 Maryland Ave.  
Lansing, MI 48906

The past year's activities have pretty much revolved around our toddler-aged daughter. Next year is being devoted to rennovating the house.

BUTTERFIELD, Charles (1971)  
9582 Muirkirk Rd. Apt 102  
Laurel, MD 20811

After many years in grad school (nuclear physics) I bailed out of the Ph.D. program, for economic and job-content reasons, to work in the computer field for General Electric-Space Division, near NASA Goddard. Three years with G.E. convinced myself and several colleagues to go into business for ourselves and we are now experiencing the thrilling uncertainty of entrepreneurship. Planning to visit parents in Nepal this year. My best to Captain Kirk.

CARLISLE, Kevin K. (1977)  
3431 Walnut St.  
Lambertville, MI 48144

I have just finished my didactic year at Long Island University (Physicians Assistant Program) and start my internship in August. Future plans may include surgical school at the Montefione Hospital in the Bronx, N.Y.

CHAPMAN, Dave and Amy Southwell (1971) (1973)  
4360 Hagadorn Rd.  
Okemos, MI 48864

From our front porch I can see an MSU power plant on the horizon beyond the horse pastures. Amy's feeding the MSU horses grass while she breaks from working her large garden and fledgling orchard. Her industriousness reminds me that I need to check my bees and finish some housework soon. (But alas, the cat is sleeping on my lap right now.) A little to the north up Hagadorn Road I can almost see Holmes Hall. Amy and I have biked or hiked that stretch a lot. Amy has gone that way to various jobs and to deliver LBC graduation certificates. (I believe she has lettered every graduate's name since the college began.) I've traveled that road to a graduate assistant job in LBC and a teaching job at Lansing Community College, among other things.

During the last year Amy has been most occupied with careers in calligraphy, rototilling and selling advertising in The Christian Science Monitor. She is learning the piano, playing flute at weddings, is involved with her church, and can tell you anything you want to know about roofing a house. Much of my time is taken up with teaching at Okemos High School and the Eaton Rapids Adult Education Program, along with curriculum development in science, energy, consumers, and environmental education. I am active in the Michigan Environmental Education Association, Michigan United Conservation Clubs and other environmental and educational groups. I am vice-chair of the Ingham County Energy Commission and chair a special citizens committee advising our Michigan Senator on energy and environmental issues.

While I collect fancy sounding titles, Amy seems to be doing the most work around here. Work is kept in place, however. There is always time for friends and pot luck dinners; time for playing the dulcimer, pressing cider, and ... oh yes, playing volleyball on our carpeted court!

CHENG, Joan H. (1978)  
2107 Wyllys Street  
Midland, MI 48640

After graduation from Briggs College last spring term, I spent several weeks of the summer traveling in Europe. In the fall I began my medical studies at Wayne State University. I have been very happy with my choice to enter medicine and to do so at Wayne. This summer I will spend most of my vacation in Newport, Rhode Island. Plans for next year include the continuation of my studies at WSU and a possible trip to China with my father to visit relatives.

CLEGG, David A. (1971)  
3414 O'Henry St.  
Garland, Texas 75042

I'm still living in Garland, Texas working for Texas Instruments. My wife Chris is making steady progress in her education; she expects to begin taking calculus next fall. I've been travelling quite a bit lately for my job; mostly to Corpus Christi, Texas for a couple days at a time.

COOPER, Mary Ann (1971)  
9406 Parker St.  
Omaha, Nebraska 68114

Since finishing my residency in Emergency Medicine at the University of Cincinnati, I have taken a few months off and seen a little of Southern Europe as my graduation present to myself. I then took the job of Associate Director of the Emergency Unit at Creighton University. I am on the faculty in the Department of Surgery (of which we are an academic division). My responsibilities include designing and implementing an Emergency Medicine residency (starting July 1979), teaching our helicopter flight nurses special skills, administrative and other teaching duties at the University. It is a most interesting and challenging position where I am still learning and growing and building my own programs. I have purchased a condominium and am currently enjoying my garden and exploring Omaha, especially its excellent dinner theater.

COUCHMAN, David R. (1975)  
224 E. Washington  
Ionia, MI 48846

I've been living in Albuquerque for two years, working for A.H. Robins Pharmaceutical Company. My job consists of calling on pharmacies, hospitals, and physicians to detail them on various pharmaceuticals. I plan on remaining in New Mexico to enjoy the sunshine and mountains.

CORIEVILLE, Jane (1979)  
1810 Hollywood  
Grosse Pte. Woods, MI 48236

I am a waitress until the middle of July. Then I am going on a vacation to the Canadian Rockies, backpacking in Bauff Recreation Area with another Briggs Alumni, Mark Neumann. We are then driving down to California to visit Richard Begley and then to Missouri. I am starting Medical School at Washington University in St. Louis in August.

CORTEVILLE, Douglas Floyd (1972)  
2215 Fairplain Avenue  
Benton Harbor, MI 49022

Last year, I was at the Naval Postgraduate School in Monterey, California; I graduated on June 22, 1979, with a Master of Science degree in Electrical Engineering. As you can tell, I am still in the Navy. Now I am at the Navy Submarine School in Groton, Connecticut where I'm in a six-month course--Submarine Officers Advance Course (SOAC)--which will prepare me for my next billet as a department head on board a submarine. In January 1980, I am scheduled to report to the Alexander  
(continued)

Hamilton (617)(BLUE) as Engineer; the submarine is homeported in Groton.

COX, David L. (1975)  
P.O. Box 2653 6008 Timber Hollow Lane  
Springfield, Virginia 22152

In the past year, I have left the Long Lines Department of AT&T in New Jersey to assume a position as the Manager of Technical Sales Support Efforts in the Marketing Department at Satellite Business Systems Headquarters. SBS is located in McLean, Virginia just outside of Washington. SBS is a partnership of IBM, AETNA, and COMSAT to provide domestic satellite communications services to the business community. My wife works for Nationwide Insurance as an analyst in Falls Church. We have purchased a townhouse in Springfield, Virginia and are hard at work rehabilitating it.

DACUS, James D. (1973)  
612 Wayland  
East Lansing, MI 48823

Finishing Internal Medicine residency in July 1980 and plan to go into private practice.

DENDRAMIS, Nancy Christine (Reese) (1975)  
1441 Hartwood Drive  
Cincinnati, Ohio 45240

My husband, Achille, and I moved again for the fourth time in less than three years. I finished some work for the Department of Anesthesiology, University of Florida last December and he finished a post-doctoral position in Physical Chemistry at the U. of Florida Chemistry Department. Hopefully, our new location, Cincinnati, will be somewhat permanent. We bought our first house last January and Achille has a staff position in the research division at Procter & Gamble. I have been playing housewife, making curtains, buying furniture, gardening, etc. Hopefully, this fall I'll secure a new job in the area as a chemist.

DE VREUGD, Paul (1978)  
1928 Millbank SE  
Grand Rapids, MI 49508

I spent the last year working full-time in Grand Rapids, while commuting two days a week for classes at State. I'll be moving to the Detroit area in September to attend Wayne State for a Master's in Speech Pathology, and I'm getting married to Shellee Hein (who I met at Holmes) in June of 1980.

DOUGLASS, Richard M. (1978)  
1570 Oak Avenue Apt. 601  
Evanston, IL 60201

I have completed my first year at Northwestern University's Graduate School of Management. I will finish up this coming year with majors in Management Information Systems and Accounting. This summer I am working with Arthur Andersen & Co., a "Big 8" accounting firm, in their management consulting division. Upon graduation, I will probably pursue management consulting full-time. Oh, by the way I got married last summer.

DOWNS, Mary M. (Schaefer) (1971)  
29 Kenmore Avenue  
Pittsburgh, PA 15221

Since the last newsletter, I was divorced and just a week ago got married again. My husband is also a computer programmer at Westinghouse R & D except he's a systems programmer and I'm in applications. We and our two cats are living in a duplex apartment saving money to buy a house in a year or so. My job is boring at times but generally enjoyable, especially the part involved with keeping our local version of APL running smoothly. I'm currently playing oboe and piccolo with three bands, one of which is a professional band. All in all, I'm keeping busy.

DUPUIS, Steven J. (1972)  
2431 Lake Drive SE  
Grand Rapids, MI 49506

My wife Nancy and I moved to East Grand Rapids two years ago, following my post-graduate training. I'm presently practicing family medicine in Cedar Springs (north of Grand Rapids). We are expecting our first child in October, and can be found most days sailing on Lake Michigan.

EARLE, Guy H. (1972)  
5706 Highland Drive  
Midland, MI 48640

I will be finishing my family practice residency at Midland in June 1980. From here we will be moving to Gladstone in the Upper Peninsula to set up practice. During the last year Cathy and I were blessed with another son, Andrew (born Christmas Day). Benjamin, who is two years older (announced several newsletters ago) is thriving. The only plans for travel other than a lot of running back and forth to the U.P. are to Vermont this winter for skiing and Scotland in the summer for a couple of weeks of pure fun!

ECKERSON, Inta Inese (Mezulis) (1973)  
49 W. Chestnut  
Petersburg, MI 49270

In the summer of 1978, I went to Europe for four weeks, enjoying the tourist attractions in London, Paris, Florence and Amsterdam. During the school year I was just coaching volleyball and junior high track, in addition to making wedding plans. We bought a house in the sleepy village of Petersburg, Michigan. I've devoted this summer to gardening, remodeling, sailing and a suntan.

ELDREDGE, Michael and Cindy (1971)  
602 Bloomfield  
Traverse City, MI 49684

The past year has brought many changes for us. In September we had our second baby girl, Kristy. She and Becky (now two and one-half) keep us busy and entertained. In June we moved to Traverse City where Michael begins his private pediatric practice. We look forward to all that Traverse City has to offer, recreationally, medically, and in our beautiful new home. Any of you in the area please stop by. The phone is listed under Cindy Eldredge. 946-1157.

ERNST, Sharon L. (1978)  
1708 Niles Avenue  
St. Joseph, MI 49085

In March 1979 I started working for the Michigan Department of Natural Resources in the Water Quality Division as a "water quality specialist". In short, I'm a bureaucrat but I find the job interesting and challenging with young and enthusiastic co-workers. My husband, Keith and I are looking forward to moving into a new house in South Lansing this summer. I have no immediate plans for Grad School but will be involved in an advanced training program in the DNR and possibly classes from MSU next year.

ETTLINGER, Robert (1977)  
46 New England Drive  
Lake Hiawatha, N.J. 07034

I just finished up my second year at Rutgers Medical School in June ... it was hell on earth. Now we have our last summer off, and I'm trying to be as unproductive as possible. When I'm not having wild times, I'm working this summer at the Respiratory Care Unit in a Veteran's Administration Hospital. School starts again in August, and I'll be glad to finally get out of the classroom and into the hospitals. E.S.S.A.D.

FELDMAN, David Jay (1978)  
25632 Lincoln Terr. #302  
Oak Park, MI 48237

We are expecting our first baby in November.

FISCHER, Robert G. (1972)  
1245 Island Drive Apt. J-103  
Ann Arbor, MI 48105

Same as last year; I continue to practice general dentistry in Ypsilanti, and Louise starts her second year at U. of M. Medical School

FISHER, E. Marshall (1972)  
4723 Bartram St.  
Rockville, MD 20853

Still enjoying my work with education in the computer industry as well as my time off from it. Suzanne and I have just become homeowners, with all the mechanical discoveries that come with it. The Washington area, with its magnified intensity of political coverage, provides us with a fascinating (if imbalanced) vantage point from which to judge each week's national crisis.

FISHER, Lydia G. (1978)  
103 Gable Hill Rd.  
Levittown, PA 19057

Medical School went well this past year. I enjoy living in Philadelphia because there is so much to do and see. I have taken advantage of the city's restaurants, block parties, and classical music concerts. As for activities this past year I gave tours of Temple University's facilities and joined the Med School's volleyball team. I think of MSU and Briggs and someday hope to visit. Love to all.

FISHER, Suzanne Eileen (Ostlund) (1972)  
4723 Bartram Street  
Rockville, MD 20853

The past year has been occupied with settling-in to the Washington, D.C. area. My post-doctoral research on the biochemistry of viral tumors in mice is progressing nearly on schedule. I have found the National Institutes of Health a tremendously exciting place to work and particularly enjoy the close association of clinical and basic research. The purchase of a home has brought many new projects for after work hours, sore muscles and homegrown vegetables.

FORESMAN, Herbert K. III (1973)  
#154, 18780 N.W. Rock Creek Circle  
Portland, Oregon 97229

I am finishing specialty training in Family Practice Medicine. My wife, Dee, is a registered nurse in cardiovascular medicine. We are expecting our first child in November.

FRIEDMAN, Lisa Cruvant (1974).  
222 Randolph Dr. Apt. 307  
Madison, WI 53717

After four muggy years in Missouri at the U. of Missouri Medical School, I have returned north and find myself as a first year resident in internal medicine at U. of Wisconsin-Madison. Long-range plans are uncertain as to specialization within medicine and permanent residence.

FROST, James (1971)  
636 Marine St.  
Boulder, COLO 80302

After a year of going to school at nights, I've been accepted as a full-time graduate student for next fall. My degree will be somewhere between architecture and planning. I now own no bicycle shops--construction is much better money and much less aggravation. After this degree I'm looking at law school, but that's a ways off.

GALANTE, Ignatius Nelson (1972)  
8490 Kingsley  
Canton, MI 48187

Teaching eighth grade math and science is my main task; although year round school is not very appealing to staff, students or parents our School Board refuses to drop it. On a part-time basis I'm teaching Behavior Modification skills for Weight Watchers of Central Michigan. I've lost 107 pounds myself. P.S. I'm shooting for my Ph.D. in "Behavior Modification".

GAREY, Kathleen (1978)  
39 Royal Drive Apt. 178  
Piscataway, N.J. 08854

I have spent most of the past year becoming acquainted with my new surroundings and adjusting to a full-time career. I will be starting graduate  
(continued)

school part-time in the fall of 1979 in Industrial Engineering which I'm sure to enjoy. I spend most of my spare time in New York City or at the New Jersey shore and my other travels include visiting Michigan and my family whenever possible.

GENUNG, Sharon Lynch (1973)  
31 Sheraton Oaks Drive  
North Little Rock, Arkansas 72116

I am currently working on a master of science degree in microbiology; particularly interested in clinical applications. I'll be applying for medical school this fall and hope to go into infectious diseases if accepted. My husband and I are enjoying Arkansas and plan to stay several more years, provided the Air Force is agreeable. No children yet, although our cat thinks that she fits the role.

GILLESS, Janice Whitman (1978)  
2231 Woodview Ct. #32  
Madison, WI 53713

Well, Keith and I got married two days before school started (the honeymoon was a riot) and things have been moving fast ever since. I thought I'd perish from physiological chemistry first term, but otherwise medical school has been interesting. We have not had any patient contact though, so I'm not in love with medicine yet. It isn't like the movies! However, as a Summer Fellow in Psychiatry I am learning about how at least this end of the field operates. I am growing to like it --and I almost believe in a modicum of Freud!

GILMORE, Bryce (1975)  
4373 Weatherby Lane  
Traverse City, MI 49684

Fellow Classmates: This past year has been most satisfying. I currently hold a challenging and rewarding position within the staff of the College of American Pathologists. I have purchased a new home and have recently returned from an excellent vacation in the Bahamas.

GLAS, Ronald and Pamela (1974) (1975)  
3900 Haskin Dr.  
Midland, MI 48640

Ron has completed half of the requirements for his Masters Degree in Analytical Chemistry and hopes to complete his degree within the next year. We are proud to announce the birth of our second child, a daughter, Melinda Kay, on July 9, 1979.

GODFREY, Janeen Gore (1975)  
326 Western Avenue  
Coldwater, MI 49036

After working two and one-half years as a secondary math teacher in the Lakeview School District (Battle Creek) I plan to take some time off. I should be kept busy by my two-year-old son, David, and my two-week-old daughter, Jenna. I also plan to finish the requirements of my teaching certificate by taking classes through State sometime this year.

GOLDEN, Mary L. (1978)  
549 Dennis Street  
Adrian, MI 49221

During the past year, I have worked as a math and science teacher at St. Louis High School. I taught two courses of Algebra I part I, two courses of Introductory Physical Science, and one course of Consumers Math. Besides this, I have been yearbook advisor in charge of putting out a 184 page yearbook. I have just moved to Adrian, have a summer job and look forward to teaching again. I have begun work on a Masters in Philosophy of Science, a major I discovered interest in due to Briggs. I am filling in right now an undergraduate background in philosophy, taking my first course last spring.

GOLDMAN, Doris Armstrong (1971)  
1304 Scottsdale Drive  
Champaign, Illinois 61820

In the past year I made a hammer dulcimer and some quilts. This year I'll be starting on a Ph.D. in ecology at U. of Illinois.

GOLDMAN, Robert F. (1971)  
1304 Scottsdale Drive  
Champaign, Illinois 61820

In the past year I've been a medicine resident at St. Joe's in Ann Arbor. Now I'm done. The only noteworthy event I can recall was the dramatic production of "A Day in the Life of an Intern" which enabled me to get back into the theater once again. In mid-August I'll start working at the McKinley Health Center (student health service) at the University of Illinois. I don't have any plans for subspecialty training at present.

GOMSI, Walter M. (1977)  
1932 Haste #10  
Berkeley, CA 94704

I'm still working and playing in the city of the golden gate; making thinking machines perform and searching for the perfect hangover cure. All passing through are encouraged to visit. (I'm in the Oakland Directory.) I'm now living in the last vestige of the 60's, Berkeley. Due to the underwhelming response, single women are still encouraged to write.

GOSS, Michael (1975)  
6101 Melody Lane Apt. 3017  
Dallas, TX 75231

This past March I moved out into the so-called "Real World", forsaking (for a while at least) the calmer atmosphere of the research and academic environments at Fermilab and at MSU. Living most of last winter hemmed in by the 10-foot snow drifts in Illinois persuaded me it was time to move someplace warm.

GREBNER, Michael (1972)  
5025 Brookside  
Jackson, MI 49203

June 30th of this year marked the end of my Family Practice Residency in Berwyn, Illinois. It marked the beginning of my being among the gainfully employed (I hope). Joanne and I are moving to Jackson where I'll begin practicing medicine August 15th. Joanne has a position at M.S.U. in the Center for International Rehabilitation. Our cat and dog have a new yard to explore. In short, all is well with us and we hope it is with you.

GREENWOOD, Sharon (1976)  
770 W. Sylvania  
Springfield, MO 65807

In December, I completed two years as a Peace Corps Volunteer in Nepal, where I worked as a science teacher in a village high school. This September, I will begin a two-year master's degree program at the U. of M. School of Public Health. This summer, I am continuing as a volunteer, working both with local environmental groups and with handicapped children.

GRIFFIN, Donald G., Jr. (1973)  
100 Eton Dr.  
Pittsburgh, PA 15215

I will be completing a tour of duty in the Army in December. I plan on staying here in California and working in a private practice. Michigan's nice, but who needs all those clouds?

GRODIN, Alan (1978)  
25020 Kenosha  
Oak Park, Michigan 48237

Since graduation, I spent the first summer relaxing and working a few weeks. Dental school took all my time from August until April. Right now I am on my summer break and am living in California until my sophomore year at U. of Detroit begins in August. I'm working at a hospital while I'm here in Santa Monica.

GROVE, John H. (1975)  
293 S. Finley St. Apt. B-18  
Athens, GA 30605

I am in the second year of a Ph.D. program (soil chemistry/soil fertility) at the University of Georgia. My wife and I have enjoyed our stay in the Deep South, though we miss the snow and our No. 1 ranked basketball team. To our friends we say hello and send our best wishes for happiness and health in the year to come.

GUITE, James H. (1974)  
8291 Fawn Valley Circle  
Clarkston, MI 48016

Selling massive quantities of Coca-Cola in East Detroit. Coke adds life to Detroit! Have a Coke and a Smile!

GUTOWSKI, Walter S. (1971)  
1298 S. Eton Rd.  
Birmingham, MI 48008

The past year was spent attending military schools, nine months for the Infantry Officer's Advanced Course at Fort Benning, Georgia and three months for the Supply Management Officer's Course at Ft. Lee, Virginia. Plans for the next year are simple: back to work with the Sixth Infantry Division in Korea.

HAGBERG, Bill (1977)  
6737 Collins Avenue  
Pennsauken, N.J. 08109

I am attending medical school at Northwestern University in Chicago. Medical school can be a hassle at times, but Chicago is a great place to live. I am now doing my surgery clerkship and am looking forward to the day when I can again sleep past 5:30 A.M.

HAICL, Julie (Croly) (1976)  
3617 Comanche Ave.  
Flint, MI 48507

After getting married in September of 1976 to Mike Haicl, I moved to Flint. I am currently working as a medical technologist in a private lab. My area of work is mainly concerned with radioimmunoassay. Last winter I became a registered EKG technician. I am presently serving on the Environmental Review Committee for Genesee County and the City of Flint. This has proven to be very interesting, but frustrating, too (politics). Since our marriage, Mike and I have traveled to England and Mexico. We have bought a house in the city and are really enjoying being Mr. and Mrs. Homeowner.

HALPERIN, Eva (1978)  
Box 1618  
M.S. Hershey Medical Center  
Hershey, PA 17033

My quest for that ever so valuable advanced degree began last August right here in the thriving metropolis of Hershey, Pennsylvania. In spite of the stench of chocolate and the proximity to Three Mile Island I'll be continuing that quest, hopefully garnering a Ph.D. in pharmacology sometime in 1982. I'll be sure to let LBC know when I'm up for a Nobel.

HARRIS, Charlotte (1973)  
2116 North Seminary #27  
Chicago, Illinois 60614

I am in my third year of residency in internal medicine. My future career plans are to do a fellowship in rheumatology. This summer I hope to spend a week canoeing in Wisconsin. Last year I went white-water rafting and loved it.

HARRIS, William A. (1974)  
110 East Euclid  
Jackson, MI 49203  
(continued)

I have been married two years and will become a father in the very near future. Wish me luck!

HARSTINE, John Robert (1972)  
1911 Arlington  
El Dorado, Kansas 67042

In December 1978 I graduated from Air Force Tech with a Masters Degree in Nuclear Effects. It would have been Engineering but my LBC curriculum didn't include many engineering courses. The Air Force sent me to Kirtland AFB, New Mexico where I am renewing my side interests in bridge and wargaming.

HAUSMAN, Mark A. (1975)  
2462 Beechwood Drive  
E. Grand Rapids, MI 49506

This has been the fourth and final year of my doctoral program in astrophysics at Princeton University. My thesis is entitled "Computer Simulations of Interstellar Cloud Collisions." This fall I begin a postdoctoral fellowship in Theoretical Astrophysics at the University of Texas at Austin.

HEDEMANN, Kathleen (Meier) (1975)  
804 N. Sierra Bonita  
Pasadena, CA 91104

I have been working for the past one and one-half years as a physical therapist at Children's Hospital of Los Angeles, and I really love it. Mark and I are looking forward to a trip to Mexico in the fall and he's hoping to be finished with his Ph.D. soon after that. Then we'll probably be relocating somewhere?!

HEDEMANN, Mark (1974)  
804 N. Sierra Bonita  
Pasadena, CA 91104

I am continuing my graduate research on magnetic fluctuations in a tokamak plasma at Cal Tech. I hope to be writing my thesis this fall. After that, we'll try to move out of the smog.

HENDRICK, Carol (1977)  
37572 Via Rosalie  
Mt. Clemens, MI 48043

Greetings (again) from Madison! I'm still in grad school at the University of Wisconsin, plugging away at a degree in Plant Pathology--it will probably take two more years. Right now I'm spending most of my time worrying about a paper I'm supposed to give at the end of July at the Annual Plant Physiology Meetings in Columbus, Ohio. It's going to be traumatic.....! But, all panic aside, even if high-pressure research ain't much fun, Madison sure is, and makes it all worthwhile. (One of the last bastions of progressive politics, and all that.) Come and visit sometime!

HICKS, Kathleen A. (1978)  
206 A Hamlin Hall  
Oakland University  
Rochester, MI 48063

Hello! This past year, I have been studying applied mathematics at the University of Wisconsin in Madison. My minor is physics; my pastimes include running and choir. I'm currently working in the Physics Department at the GM Tech Center in Warren, Michigan, on a combustion project. I will return to Madison in the fall to continue graduate work, and on December 29th will marry another Briggs alumnus (79): Art Morrish.

HICKS, Ron (1975)  
5020 River  
Lansing, MI 48917

Scheduled to graduate from MSU College of Human Medicine (Upper Peninsula Medical Education Program) in the winter of 1980.

HOBBS, Jesse (1975)  
952 Ravenna Rd.  
Kent, Ohio 44240

I have found Jesus Christ as my Lord and Savior and one year ago I gave up my budding career in academia to devote myself to following Him. I haven't regretted it, and I look forward with great hope and anticipation to the coming year.

HOEKZEMA, John Mark (1977)  
1204 Snyder  
East Lansing, MI 48823

On December 9, 1973, I married Susanne Hospers, a senior in MSU's Nursing Program. Sue graduated in June and is now working for St. Lawrence Hospital as a graduate Nurse. I plan to continue at the Michigan State Housing Development Authority while I complete a degree in Management.

HOPP, Wallace (1978)  
1331-F McCutcheon  
Richmond Hts, MO 63144

In September 1979, I plan to move to Richland Washington, where I will work for Battelle Pacific Northwest Laboratories as an Energy Policy Analyst, while my wife goes back to school for an elementary education degree.

HOWARD, Don (1971)  
Department of Philosophy  
University of Kentucky  
Lexington, KY 40506

During this past year I finished my Ph.D. in the Philosophy of Science at Boston University, began my job as an Assistant Professor of Philosophy at the University of Kentucky, had my first paper published in Environmental Ethics and have generally been busier than at any time since graduating from Briggs. This summer I've gotten a grant to work on a translation of some papers in the foundations of mathematics by David Hilbert and Paul Bernays. Next year I expect will be much like the past year--teaching and writing and enjoying the Bluegrass.

HOWELL, Joel (1975)  
5601 S. Maryland Apt. 3  
Chicago, IL 60637

This spring I have been enjoying baseball at Wrigley Field prior to graduation from Medical School; in June I start a residency in Internal Medicine at the University of Chicago Hospital and Clinics. Linda Samuelson, my wife ('76), has passed qualifying exams and is working towards a Ph.D. in somatic cell genetics.

HUGHES, Chris (1975)  
109 South Brainard St.  
Naperville, IL 60540

I'm now in the second year of my job at Bell Laboratories in Naperville, Illinois. I'm designing software to control a new telephone switching system. I plan on staying here at least through the next couple years. In the warmer months, I spend most of my leisure time bicycling.

HURLEY, Marian Kurtz (1976)  
7003 Bascombe Drive  
Huber Heights  
Dayton, OH 45424

In the past year I moved from Detroit and my job with Immigration and Naturalization to Dayton, Ohio and a new trainee position with IRS.

HYDE, Lawrence W. and Portia J. (Knight) (1971)  
22544 P Drive South  
Homer, MI 49245

We have been learning the joys and frustrations of raising and living with an energetic toddler, picking up data on the art and science of small-time farming, and coping with the economics of day-to-day living. The next year will include more of the same. We will be working on our "continually under-construction" house, improving our land and enjoying country life.

IRISH, Cathleen (1977)  
120 W. Lexington #20  
Davison, MI 48423

After interning a year at Detroit General Hospital, I acquired my job at St. Joseph Hospital in Flint where I work as a medical technologist. In the laboratory, I rotate between the departments of chemistry, hematology, blood bank and microbiology. In a couple years, I hope to come back to State and work on a Masters.

JONES, Annette (1975)  
S.R. Box #30072  
Fairbanks, Alaska 99701

My past year has been spent working on my Master's thesis on predatory soil arthropods in a black spruce forest. I usually only travel "outside" (to the lower 48) once a year. Last year I got to take a field course in Hawaii. I enjoy living in Alaska and would like to stay here if I can get a job. The future is a big unknown. Top priority now is to finish the thesis.

JONES, Stephen W. (1974)  
200 Longford Avenue  
Elyria, Ohio 44035

I am currently finishing work on my Ph.D. in neurobiology at Cornell. The next two years I will be a post-doctoral fellow (Muscular Dystrophy Foundation), also at Cornell. My main research interest is the molecular basis of synaptic transmission. For my Ph.D., I have been using biochemical techniques; my post-doctoral fellowship will involve autoradiography on the electron microscope.

JOYNER, Robert W. (1972)  
7510 Louisa Allen  
San Antonio, TX 78240

I've been in the Air Force since 1973. If any of you who read this are considering accepting a scholarship from the military--think strongly about going into debt instead.

JUENEMANN, Julie (1978)  
658 South Brys  
Grosse Pointe Woods, MI 48236

Hi! I'm back in school again, this time at the University of Pennsylvania in Philadelphia, going after my Ph.D. in School Psychology and Child Development. Kurt Stanley (another Briggs grad) and I are engaged to be married next June.

KAGEL, John (1975)  
1029 Riverside Drive  
South Bend, Indiana 46616

I have been a graduate student at Indiana University in Indianapolis for the past year. My area of interest is immunology and my research deals with biophysical and biochemical changes in stimulated lymphocytes. Plans for the upcoming year include mostly continuance of my graduate program.

KANIEWSKI, Wayne R. (1971)  
207 Trinity Place  
Ladson, S.C. 29456

I'm starting my last year in the Family Practice Residency at the Naval Regional Medical Center in Charleston, South Carolina. Between my job, and our son Danny (seventeen months), Judy and I are constantly busy; and I'm tired of being a student!! We're hoping to be transferred to Orlando, Florida next year.

KAWAOKA, Suzanne Clark (1975)  
216 Cobb Terrace  
Rochester, N.Y. 14620

I am working in the area of instant photography at Eastman Kodak. This year I acquired a technician to help with my research. Both myself and my husband Kenji are avid downhill skiers and tennis players.

KAZANSKI, Mary Beth (1978)  
2345 N. Harrison, Apt. 22  
East Lansing, MI 48823

This past year has been academically, a year off for me. While waiting for acceptance into medical school, I took a job to support myself financially. The 8-5 routine with its evening and weekend free time was a welcome change to the hours I kept in school. For the first time ever, I had the time to get involved in many non-academic things (painting, music, tennis). It was great! But of course it couldn't last forever. I start school again this fall refreshed and ready thanks to this past year off.

KIDLE, Mary Kay (Lenton) (1971)  
8991 Satellite  
Union Lake, MI 48085

Two major events made 1978 a memorable year for my husband John and myself. In July, we along with our fifteen-month old son Andy, moved into our new home in Union Lake. Three months later we became a family of four with the arrival of our daughter, Emily Kay, on October 24th. The kids and house have become my full-time job, while John continues to work for Michigan National Corporation and takes classes for his Masters in Business from U. of M.

KLOOSTERMAN, Peter (1973)  
415 W. Doty St.  
Madison, WI 53703

I'm writing from my car in North Dakota, headed for the west coast where I plan to be a bum for five weeks. The alternative school where I taught in Madison was axed this spring. I expect to be offered a teaching position at another school in Madison in August. In the meantime I'm just climbing, backpacking and sunbathing.

KOLTONOW, Sanford (1976)  
21951 Kenosha  
Oak Park, MI 48237

As of July, I've begun my senior year at Medical School. Will finally be out of school come March 1980. This fall I'll be doing electives at other Universities (Maine, Washington, California) looking for a Residency position. Hopefully in the spring (April-June) I'll be able to travel this being my last "free" time.

KRUEGER, Bruce (1975)  
813 S. Church St.  
Hastings, MI 49058

Debbie and I are expecting our second child in September. With both of us working, my attending MSU part-time to get my M.A. in counseling, being parents, and participating in many other activities we find our time well-filled.

LA HAIE, Patricia Ann (1977)  
Star Route #3 Box 3224  
Iron Mountain, MI 49801

I attended University of Michigan Medical School as a second year student this past year. I also was active in Student Government, and served as a Class Advocate and Vice-President of the Medical Student Council. After a brief summer vacation, following the National Boards June 13-14, I will be starting my rotation through various departments at University Hospital, Ann Arbor VA Hospital, St. Joseph Mercy Hospital, and Hawthorne Psychiatric Center. I guess that will keep me busy enough and out of trouble!

LANG, Philip S., Jr. (1976)  
5620 S. Denis Ct.  
Hales Corners, WI 53130

It has been very busy these last 6 months. It has been a 6 day work week since January with a lot of 12 hour days. New job as maintenance supervisor or as of January 1979. Enrolling at University of Wisconsin for M.S. in Industrial Engineering. First baby due in November.

LAPENTA, James A. (1977)  
416 Jagoe St. Apt. 3  
Denton, TX 76201

After graduation in the Fall of 1977, I spent several months as a driver for a trucking company. With these savings I travelled south to Texas to seek employment in a professional field. As a result I am presently doing process and material and development of carbon and graphite for Poco Graphite, Inc., a subsidiary of Union Oil of California. I plan this fall to attend North Texas State to begin work on a masters in Chemistry.

LARSEN, Mark (1975)  
1510 Eucalyptus Hill Rd. #B-3  
Santa Barbara, CA 93103

I finally graduated from U. of M. Medical School (escaped). Actually, it was basically a pretty good education. My wife Barbara and I moved to Santa Barbara in June. We stopped at Rocky Mountain National Park on the way--it's absolutely spectacular--we recommend it highly. We have an apartment overlooking the ocean, but I wish I had more time to enjoy it. I'm working the average intern's week of a hundred or so hours--and I basically like it--except for the unpaid overtime. I'm going into Radiology next year--as far as I'm concerned it's the only sane way to go.

LE CHEVALIER, Robert (1974)  
3727 College Avenue  
San Diego, CA 92115

I'm still plugging away at the old job, saving my money and enjoying the fruits of the San Diego real estate market. With luck, I will sell my house in the next year or two, relocate to Oregon or  
(continued)

Washington, buy some acreage and build a house, and invite all my fellow Briggsies to do the same. We may do this as a community venture with others who are interested in experimental approaches to living in the post-industrial energy-poor U.S.

LEE, Edward Kai (1972)  
8036 Ward  
Detroit, MI 48228

After graduation from the MSU College of Osteopathic Medicine, I went into a rotating internship at Martin Place Hospital in Madison Heights, Michigan. With completion in September 1979, I will begin a residency in Family Medicine.

LEVESQUE, Claire (1975)  
83 Evergreen Avenue  
Tiverton, Rhode Island 02885

Hello everyone! I'm employed as a Chemistry Technologist at a Providence, Rhode Island hospital. In addition to performing all the usual clinical chemistry tests, I maintain and trouble-shoot one of the key machines in the lab. I also have a reputation in the lab as being the local representative of the Women's Movement! My summer plans included some travelling on the East Coast, but the gasoline situation may keep me in my backyard.

LIEBOW, Mark (1974)  
1431 Morrison  
Madison, WI 53703

My last year was wholly consumed in being an intern. This year I'm a resident, a dramatic change in role and one that gives me more "free time". Much of this time will be devoted to studying internal medicine, but I hope to use some to become reacquainted with the world outside medicine. Next year should bring my first overseas trip, to England and Israel. I'm still single and with the crimp internship put in my social life, very much unattached. I would be delighted to see any LBC alumni passing through Madison.

LONG, Dale F. (1978)  
15119 Kipke  
Detroit, MI 48239

I have been with Industrial Chemical for about eight months now, but I'm also looking for a new job more closely related to my Biological education. I hope to find a house to move in, by the end of the summer. I plan to do some traveling and camping throughout the summer. In the meantime, I've been playing softball and keeping reasonably busy.

LYDENS, Susan M. (1975)  
2430 Polk Avenue  
San Diego, CA 92104

After completing the required coursework for my M.S. in geology the financial situation got too lean to have money to support me through research and thesis. So the M.S. is on hold while I work.  
(continued)

The Lab Assistant job I have at the University of California at San Diego only makes ends just meet, (with stretching) so I hope to use it as a stepping-stone into Scripps Institute of Oceanography. (RESEARCH WITH PAY!) Meanwhile any odd job is OK--I even house-sit for Bob LeChevalier. (Forgiveness is a Christian virtue; besides he pays well.) Being single while my two younger sisters are married seemed weird at first, but I'm used to it now.

MANZANO, Vicki L. (1977)  
1241 N. Hayford  
Lansing, MI 48912

I am looking forward to beginning a year of clinical rotations in September. My last year of Medical School--at last! The past year, while still academic, has also provided increasing clinical exposure which I've greatly enjoyed. It's terrific to feel I'm finally achieving a goal toward which I've worked so long. May all my fellow alumni be equally happy in their careers.

MC CONNELL, David B. (1972)  
41 North Street P.O. Box 245  
Hillsdale, MI 49242

Life and work are both going well. Keeping busy! Involved in several publishing projects dealing with Michigan material. I'm becoming interested in micro-computers for fun and profit. Best wishes to all of my old friends, wherever you may be!

MC GLEW, Sandra K. (Block) (1978)  
821 Robins Rd.  
Lansing, MI 48917

Married another Briggs alumnus, Rich McGlew, on May 19. We first met in Sue Clark's Chemistry Recitation in October 1974.

MC GUIRK, John J. (1971)  
43 S. Williams #108  
Burlington, Vermont 05401

I am currently on a leave of absence from the Geo-chemistry Program at UCLA. Since I want to continue flying for the Air National Guard and still work on my degree, I'm going to have to switch grad schools or switch Guard units.

MC INTOSH, Susan E. (1977)  
2691 Rockwood  
East Lansing, MI 48823

I have been working as an Environmental Health Sanitarian for the Ingham County Health Department since August of 1977. I quit work in May to have our first child, Carl, born on May 17. Now I am enjoying being a mother at home, with no immediate plans for resuming my career.

MEIER, Lyle D. (1972)  
11014 Sandspoint  
Houston, TX 77072

In the past year I have enjoyed being a homeowner. Secondly, I bought myself a custom touring bicycle and am preparing for a two-week tour of the Pacific Northwest, on my bicycle.

MERRIMAN, Robert S. (1976)  
4722 Duvernay  
Lansing, MI 48910

. . . back again, living and loving in the land of my dreams. More info. next newsletter. Old friends are encouraged to write.

MERRY, Pamela (1971)  
10S771 Clarendon Hills Road, #207  
Hinsdale, IL 60521

The bottom seems to be falling out of the nuclear business, so I'm into oil now, working on the Strategic Petroleum Reserve. I occasionally teach out at an Indian Reservation in the summer. Working on my instrument and commercial ratings for flying now, so come fly with me! Believe my standard of living will be lower ten years from now because the energy crisis is really real.

MICHAELS, Bryan (1976)  
46121 Village Green Drive #135  
Belleville, MI 48111

I'm still working at a small manufacturing company overseeing the computer department. I've been taking some business and Honeywell software courses and hope to start an MBA program soon. I'd love to hear from any fellow alumni.

MILLER, Karen K. (1976)  
1764 Hess Blvd.  
Columbus, Ohio 43212

My third year of vet. school was the most exciting and challenging yet. Our curriculum has the juniors spend their mornings in clinical and labs where we finally see all the facts of vet. medicine working together. The coming school year promises to be more exciting (if not more work) when as a senior, we get almost full responsibility for our cases. In my free time, I still manage to play field hockey and lacrosse on the club level plus whatever I.M. sport is in season at Ohio State University. After summer clinics end in late July I intend to take an extended vacation through the western USA (Colorado, Utah, Wyoming, Oregon and Washington), and Vancouver, Canada. I'm looking forward to the camping and hiking since I view this as the last "free summer" of my life! After graduation next year, I hope to enter private practice as a large animal vet.--possibly returning to Michigan.

MOORE, Mary Beth (1971)  
623 C. Street N.E.  
Washington, D.C. 20002

My present job is Special Assistant to the President of Planned Parenthood Federation of America in New York. I have a Manhattan apartment (and room for visitors). Doug Ruby, my husband, works in resource recovery for the Environmental Protection Agency in Washington, D.C.; there we have our home base (and more room for visitors). My spare time is spent riding the train between our two homes and playing tourist along the East Coast.

MULLINGER, Leslie Robyn (1975)  
323 Hillcrest  
Grosse Pointe Farms, MI 48236

Before attending the University of Detroit's School of Dentistry, I worked for Chrysler Corporation in Chemical Research. I am now in my second year of Dental School and will graduate in 1982.

NELSEN, Michael E. (1975)  
1620 N. Jefferson  
Hastings, MI 49058

I completed four months of Officer Candidate School and received my commission in the Coast Guard last September first. Since then I've been in Navy Flight School at Pensacola, Florida. Within the last month I've moved to Corpus Christi, Texas and am just beginning advanced multi-engine instruction. I should complete flight training somewhere around the end of the year. After a couple more months of specialized training I should be assigned to an Air Station and start flying search and rescue, marine fisheries enforcement, and marine environmental protection patrols.

NEWHOUSE, Cathey (Peck) (1974)  
2756 E. Grand River, D-7  
E. Lansing, MI 48823

For the past year and a half, I've been working for the Cooperative Extension Service in Ingham County as a 4-H Program Assistant. In this job, which I've enjoyed very much, I've done a little of everything except what I'd hoped to do after graduate school, that is college teaching in botany or biology. My plans for the near future include one major, exciting change: My husband, Chris and I are expecting a baby in December, so I will be a full-time mother for a while.

NEWMAN, Kathie (1974)  
12341 40 NE  
Seattle, WA 98125

I now seriously hope to gain my Ph.D. in Physics in fall of next year. This date means an acceptance of eventually leaving Seattle. So I am now busy enjoying every aspect of the area. I hope later this summer to finally visit Alaska.

NOEL, John Gregory (1977)  
762 Eigenmann Hall  
Bloomington, Indiana 47401

During the past year I have been working on my M.S. in biochemistry at Indiana University. To support myself, I have been working as a T.A. in freshman chemistry, a job which I generally enjoy. After finishing my degree, I hope to get an industrial position in research or production.

NUECHTERLEIN, Paul M. (1976)  
4112 Elmhurst  
Royal Oak, MI 48073

After graduation I trained in nuclear technology at William Beaumont Hospital in Royal Oak before completing my board exams. Currently, I

(continued)

am working at Beaumont Hospital as a registered nuclear technologist and teaching for the School of Nuclear Medicine.

NUNNALLY, L. Ann (1975)  
5311 S. Woodlawn Ave #2  
Chicago, IL 60615

Ira (my "significant other") and I were able to get our residencies together at the U. of Chicago where he is now doing Internal Medicine and I am doing OB-GYN. We both graduated from U. of North Carolina in May and spent a few weeks resting before moving to Chicago. For the coming year we will be very busy being interns!

NYGREN, Linda J. (1977)  
917 Helene St.  
St. Albans, WV 25177

I'm hanging in there--starting my third year of med. school soon. But first, it's off to the Wild Pacific Northwest and Canadian Rockies for some backpacking. I still plan to go into Family Practice, and I'm really excited about getting out of the lecture hall and more into "real medicine", this coming year.

ODETTE, Michael James (1972)  
14 Oakland Park Blvd.  
Pleasant Ridge, MI 48069

Gayl, Joshua, and I are continuing to gradually restore the original woodwork in our home.

OPPENHEIMER, Paul Edward  
Princeton University  
Dept. of Philosophy  
1879 Hall  
Princeton, N.J. 08540

I am beginning to study philosophy.

ORMISTON, Michael B. (1975)  
2814 Jennifer Drive  
College Station, TX 77840

I am finishing my Ph.D. degree at Johns Hopkins University. Starting July 13, I will begin my duties as Assistant Professor at Texas A & M, in the Economics Department. My wife, Aileen, will be working for a local CPA firm. We are currently settling into our new home in College Station, Texas. Hopefully, we will be living here at least seven years--that's when the tenure decision is made!

PANEK, Susan (1973)  
2818 Ridgeland Apt. 11  
Berwyn, IL 60402

Hi everybody! I survived the blizzard of '79! Springtime sure is a relief. Work goes well--the biggest moment in the past year was passing FLEX and the arrival of my license to practice medicine. I've also (finally) begun to take horseback riding lessons (been saying I was going to for years!). It's really delightful, especially jumping. Take care!

PARKER, Alan (1973)  
125 W. Dodridge Apt. 304  
Columbus, Ohio 43202

My life during the past year has been devoted primarily to settling down into married life with my wife Mary Ann and to rebuilding my experiment so I can graduate (at last) sometime in the fall. Also getting more into photography--an activity we both share--and in general, getting in as much traveling and so on as possible before entering the cold cruel world of full-time employment.

PARRISH, Charles Patrick (1975)  
746 Cardinal Drive  
Livermore, CA 94550

I am still working at the Lawrence Livermore Laboratory as a computer programmer. I bought a house in Livermore and have returned to school part-time for my Master's Degree. I hope to get it in 1981.

PAYEA, Norman P. II (1971)  
P.O. Box 95, 1198 Court Drive  
East Tawas, MI 48730

I have just finished my plastic and reconstructive surgery residency at McGill University in Montreal. This fall I will travel to Europe where I have a temporary position on the Plastic and Maxillo-Facial Surgery Service at the Carmiesburn Hospital, Bearsden, Glasgow, Scotland.

PEARSON, Douglas C. (1973)  
1318 Danberry  
Burkburnett, TX 76354

This past year I've been teaching foreign student pilots aviation meteorology. This is my primary job. I got involved in some investigation of the Wichita Falls tornado and hope to have some material published in a professional journal soon. I hope to get selected for a masters program in meteorology by next year.

PHILLIPS, Teresa A. (1972)  
2040 Charlton, Apt. 2  
Ann Arbor, MI 48103

Since November 1978, I've been working as a Research Assistant in the lab of the Chairman of the Microbiology Dept. of the U. of M. Our current project is to identify the proteins produced by E. Coli (using two-dimensional gel electrophoresis), and eventually map the entire genome (a complex and long-term project, to be sure!). In the process we're also studying the response of various proteins to different metabolic states. Outside the lab, my interests in music, flying, plants, reading, sewing continue. This coming fall I'll also be involved with the beginning of a new campus ministry (sponsored by Christian Churches, Churches of Christ) here at the U. of M.

POLAKIS, Edward R. (1978)  
1535 6th St.  
Muskegon, MI 49441

Spent fifth year at MSU taking courses for secondary teacher certification--student taught at Bridgman High School spring 1979. Plan to move south for teaching job (hate cold winters!) but may stay in Muskegon to work in industrial chemistry laboratory.

POPPER, Ronald (1975)  
532 N. Rossmore Avenue #313  
Los Angeles, California 90004

Recently graduated from MSU College of Human Medicine. Currently doing residency in internal medicine at Hospital of the Good Samaritan in Los Angeles. Good-bye snow--Hello smog!

PRICE, Cynthia A. (1971)  
3238 Pebble Lane  
Birmingham, MI 48010

In February of this year, my husband and I welcomed a new baby girl into our lives. We are happy parents for the present and I am planning a return to half-time teaching this fall.

PRIOR, Reed R. (1978)  
P.O. Box 266  
Waltham, MA 02154

Since back in 1971 (sophomore year) I have been working in broadcasting, finally rising to AM/FM station owner/manager in 1976. In 1978 I sold the stations, married Terri Murphy (former LBC associate director of student affairs), and moved to Boston to do an MBA degree at Harvard Business School. I'm now in the second year of the two-year program, and am working as a group product manager at Millipore Corporation in Bedford, Massachusetts. Hope to see some of my old classmates soon! Please let me know if you're coming to Boston, and maybe we can get together. Best of luck to all!

RAVEN, Robert A. (1974)  
13103 Larchdale Rd. #2  
Laurel, MD 20811

In July of 1978, I started working at Goddard Space Flight Center for Computer Sciences Corp. The job involves using IBM computers to monitor and command the attitude of several unmanned spacecraft, and also learn a lot about spacecraft and computers; and it's fun. Living in the Washington D.C. area has given my wife, my two sons and I the opportunity to see many museums and historic sites we might never have seen living anywhere else. It also put us in the middle of this "phony" gas shortage, but benefits outweigh the disadvantages.

REGENSTREIF, Anne (1975)  
209 N. Seventh  
Ann Arbor, MI 48103

After spending the summer traveling and job-hunting, I started working at Computer Sciences Corporation. We are doing programming for the EPA Lab here in Ann Arbor. Working has put a crimp in my travelling, but have still gotten away to Texas, North Carolina and Pennsylvania.

REITMEYER, William J. (1971)  
7800 Woodcroft Drive  
Austin, Texas 78749

During the past year or so, I have been completing my residency training in pathology in Austin, Texas. I presented a paper at the National Meeting of the Southern Medical Association in Dallas and attended a conference on clinical chemistry in medicine in North Carolina. Bebe and I and Dina (our daughter) are doing very well. Bebe is the Executive Secretary for the Austin Local of the AFSCME union. July 1, 1979 I will be starting in a new position as staff pathologist at Brackenridge Hospital in Austin, Texas.

RICHMOND, Susan (1974)  
Farrington Post, Box 51  
Pittsboro, North Carolina 27312

This past year I chose to teach at the junior high level instead of high school (which I had tried the year before) and consequently spent part of the year adjusting to junior high needs, abilities and especially energy level! This year I will be returning to the same school, where I will continue the development of an individualized program for low-and-under-achieving math students. We love our new house (which Mike designed) and are joyfully spending time decorating it, and are thoroughly amazed that we are settling down.

RICHMOND, Michael S. (1974)  
Farrington Post, Box 51  
Pittsboro, North Carolina 27312

Wow! This survey finds us at the same address as the last! I worked harder this past year than I have worked before, including my time at LBC. There was just no relief from the pressure. However, things are easing off a bit, and I am looking forward to playing happy homeowner for a while. Sue and I like North Carolina, it lacks only good pizza, having reasonable bageis and Chinese food.

RIOPELLE, Jim (1971)  
1933 Columbus Ct.  
Golden, Colorado 80401

Recently moved to mountain home for which I acted as the general contractor. Enjoying Colorado!

RUFFIER, Peter (1976)  
2869 Eggiman Rd.  
Madison, WI 53704

(continued)

I graduated from the University of Wisconsin-Madison with an M.S. degree in Water Resources Management this past August (1978). After a three month vacation, spent exploring the U.S., I accepted a position of Research Biologist with the Madison Metropolitan Sewerage District. Responsibilities of the position include the investigation and evaluation of the biological impact of a treated municipal wastewater discharge, with specific interest in the toxicity of the wastewater, and the establishment of a biomonitoring program for the receiving waters by which to gauge the effect of advanced wastewater treatment upon the stream system. I will be presenting a paper on the preliminary results of wastewater toxicity at the annual meeting of the Water Pollution Control Federation, held in Houston this year.

SACKS, Robert E. (1972)  
4861 Broadway 5-V  
New York, N.Y. 10034

After three years disillusionment with academe (MIT does that to people) I am getting back involved. I attend three to six section meetings of the NY Academy of Sciences each month, discuss my thesis work with a professor at Courant every few months (he's stumped too), and have gotten involved in a discussion of notational conventions in Linguistics. I'm thinking about changing jobs this year. My parents plan to retire, and my brother may come back to take a Masters in tax law at NYU. Next year I plan to attend the World Science Fiction Convention in Boston.

SAVOIE, Gregory (1977)  
1194 Lexa Lane  
Flint, MI 48507

In the past year I have become involved in a couple of business ventures; one of which is demonstrating a profitable short-term return as well as a large and exciting potential for the long term. My travel for the year includes two business trips; one to the Caribbean and the other to Dallas, Texas. I may return for a Master's in business in the future but I have no definite plans at this time.

SCHEPLER, Kenneth L. (1971)  
RR #3  
Clinton, Iowa 52732

After nearly four years in San Antonio, Texas the Air Force is moving us (Shirley, my wife; Daniel, our three-year-old son; and me) to Mc Clellan AFB in Sacramento, CA. My tour with the School of Aerospace Medicine involved research on the biological effects of lasers and has been enjoyable. My next assignment will also involve physics research but I will be leaving the laser field. We are looking forward to a lot of recreation in the mountain scenery of California. Too bad we are moving from one of the lowest to one of the highest cost of living areas in the U.S., though.

SCHWINKE, Janice (1975)  
1593 Blairmoor  
Grosse Pte. Woods, MI 48236

Finished at last with medical school, I am starting a residency at William Beaumont Hospital in Royal Oak, Michigan in diagnostic radiology.

SERR, Frederick E. (1974)  
5809 N. Okemos Rd.  
E. Lansing, MI 48823

After receiving my Ph.D. in physics at Stanford University last summer, I returned to E. Lansing to join the staff of the MSU Cyclotron Lab as a research associate. There I am continuing my research in theoretical nuclear physics. Also, in April 1979, I married Mary Hayes, a native of Syracuse whom I met while in California. She is a journalist and received her Master's Degree in Communications from Stanford in 1978.

SHAFFER, Paul W. (1971)  
H-5 University Gardens  
Charlottesville, VA 22903

In the past year I have (finally) started work on my Ph.D. at the University of Virginia. I have started research this summer, working on the impact of acid precipitation on stream chemistry, working in the Blue Ridge and Shenandoah National Park.

SHARP, Cleve (1973)  
11 George Finnerty Road  
Barrington, R.I. 02806

As I start my third year of residency, Jan and I are filling out the forms for the placement program in the National Health Service Corps; we hope to go to the Northwest. This summer we're going on a rafting trip in Maine (yes, the one in Sports Illustrated)--oughta be a rip-roarer!

SHUFLER, Daniel E. (1976)  
4276 Glen Lytle Rd.  
Pittsburgh, PA 15217

I am currently a senior at Hahnemann Medical College and will be graduating in June 1980. I plan to do a residency in Internal Medicine in the mid-west or on the East Coast.

SINGER, Richard M. (1974)  
14070 Talbot  
Oak Park, MI 48237

I have just completed my first year of post-graduate medical training. On May 30, 1979 my wife gave birth to an 8 pound 4 ounce boy--Ryan. This coming year I'll spend time in year number two of surgical residency eventually going into orthopedics in 1980.

SMITH, Rollin D. (1972)  
P.O. Box 468  
Umatilla, Florida 32784

I'm presently playing Prince Dauntless in "Once Upon a Mattress", the summer musical of the Bay Street Players, our community theater group in Eustis, Florida. In September, I'll be marrying a lovely lady named Charlene Tally, who is also very active in the theater.

STANLEY, Kurt E. (1977)  
4033 Locust St. Apt. 1-R  
Philadelphia, PA 19104

Since graduation I have done several things. I spent time in the Peace Corps as a junior high school math teacher on a small island in Fiji, in the South Pacific. I returned home in September 1978 and moved to Philadelphia, where I am now employed as a Research Technician in the Department of Surgery of the University of Pennsylvania. My future plans are unsettled career-wise. I am engaged to another Briggs graduate, Julie Juenemann, who is a Graduate Student at the University of Pennsylvania School of Education in School Psychology. We will be married next year.

STEWART, Joanne Teresa (Quijano) (1973)  
409 Chalda Way  
Moraga, CA 94556

This past year has been busy for me. I got married last July and my husband and I bought a townhouse in Moraga. We both enjoy the country atmosphere and we're still close to San Francisco--where I've lived since graduating from LBC. In May we spent a week on Maui--now we're spending the summer close to home--playing volleyball, camping, and sailing our small boat.

STOBBY, Richard E. (1975)  
861 S. Barnes St.  
Mason, MI 48854

Still working in East Lansing as a programmer for small development house. Excitement this summer is purchasing an old farmhouse in Mason, which we should be moved into by August. Spare time is spent playing golf, rockin' on my guitar and maintaining a modest level of partying.

SYKES, Robert C. (1974)  
28370 Hollywood  
Roseville, MI 48066

Attending classes and working part-time as research assistant for a cooperative of suburban Chicago school districts. Plan to continue research for a dissertation at the University of Chicago, in the fall.

TERAUDS, Daina (1978)  
1753 Gilsey Avenue Apt. #4  
Cincinnati, Ohio 45205

Immediately after graduation I embarked upon a week-long vacation to the Colorado Rockies. Refreshed I returned to my hometown only to move again within a month's time to Cincinnati, Ohio where I had accepted  
(continued)

my present position with the Environmental Protection Agency. In the upcoming year I have plans to continue working with EPA, gaining valuable experience which will help me in deciding what sort of graduate program I will eventually begin.

TRESSLER, Steven L. (1975)  
330 Park St.  
Manitou Beach, MI 49253

Since the last newsletter I've gone to California and finally found a job I enjoy. I work as a purchasing analyst for scientific products buying lab instruments for the West Coast. I like it so much I've become an apartment manager part-time and don't plan on updating my resume anymore. Future plans are to possibly go to Grad School for an MBA. I can't travel much because I like driving and there's no gas, but I'm planning on making it to Mardi Gras.

WANG, Steven C. (1972)  
P.O. Box 366  
Leavenworth, WA 98826

Summer of 1978 I worked with the U.S. Forest Service as a wilderness ranger. By fall I had completed (finally) my log cabin that I had been working on for 18 months. During the winter I reopened my small stained glass shop. Mainly, however, I simply enjoyed living in my new home and cross-country skiing in the mountains. A trip to Hawaii split the winter in half. This spring I began working at Lake Wenatchee State Park, as Interpretive Assistant. I'm finding it to be an interesting and challenging job. I plan on being here until fall, 1980.

WAUGH, John T. (1976)  
639 Sheffield  
Auburn Heights, MI 48057

During the past year, my wife Pat, and I have moved into our new house in Auburn Heights, Michigan. Our first child, Matthew John, was born shortly after. I am currently working in the Pontiac General Hospital Laboratory where I have recently been promoted to the position of Assistant Chief Medical Technologist. I am continuing to work on my masters at Wayne State University in Laboratory Management.

WELSH, Terry K. (1976)  
6160 Hermandad Ct.  
E. Lansing, MI 48823

Operating our business is a big challenge and responsibility, and the freedom and income potential offered through Amway is great. Janice and I can work together and we will not be shackled to a limited income or told we must move due to a job transfer or "promotion". One of the best benefits is the exposure to positive people and positivity training. This goes along very well with the religious training I have received and the teaching I have been administering.

WENGERT, Glenn B., Jr. (1973)  
1605 Willow Road #212  
Urbana, IL 61801

Received a Black Belt in Taekwon Do, a Korean Martial Art in February, should obtain my Ph.D. in October and will start job with Phillips Petroleum in November. A Great Year!

WHITE, Denise Y. (1975)  
7411 Drumlea Rd.  
Capitol Heights, Maryland 20027

I've been working full-time for over a year (hard to believe) as a biologist with the U.S. Army Corps of Engineers in Nashville. The work is challenging and has taken me many places in the country, especially in the South. Nashville is starting to grow on me. "Hello!" to Lynn Carpenter, Lisa Saunders, Michael Young, and Bill Harris.

WHITE, Stephen L. (1974)  
1024 Willow Hwy.  
Grand Ledge, MI 48837

The past two years I have lived and worked in Mexico: first as a high school science and history teacher in Queretaro, and later as a University English instructor in Chiapas. Though the experience has had its ups and downs I've enjoyed living in another culture and using a different language. This fall I will begin a Master's program in clinical social work at the University of Chicago. I hope to survive the shock of jumping from a Third World region and its tropical climate to the cool shores of Lake Michigan and mainstream urban America. During vacation next year I plan to return to Mexico, or God, money, time and my lousy French willing to take a bicycle trip through the Central Massif of France. Also, I'm anxious to see snow and ski!!

WHITMORE, Ann L. (Smith) (1975)  
MRB Box 272  
Veazie, Maine 04401

I have been living in Maine this past three years, working as an alcohol counselor. I married a Maine resident in August 1978 and so we have purchased property and plan on making our home in Maine. I am currently taking a leave of absence from alcohol counseling and looking into the job opportunities in other areas of counseling or personnel.

WHITNEY, Kahleen (1975)  
R #5 36th Street  
Allegan, MI 49010

I am now employed by a private lab in Fennville, Michigan as a Chemistry Supervisor. Any extra time is spent in travel, gardening and skiing.

WILHELM, Larry D. (1977)  
687 N. Main #2  
Presque Isle, Maine 04769

This past year my duties as Maintenance Officer at Ashland Strategic Training Range, Maine has kept me  
(continued)

very busy. What spare time I have had, I have used to go out into the North Maine woods.

WILLETT, Mark (1971)  
326 N. Pearl St.  
Granville, OH 43023

This autumn I will begin my seventh year of teaching at Central Ohio Technical College. I have found that teaching computer programming is a much more challenging, rewarding (and lucrative, considering the consulting work!) career than teaching of mathematics would have been. Pat is nearing completion of a Ph.D. in Labor and Human Resources at Ohio State, so the next career move is hers--probably in summer of 1980. Herein another plus for the computer field--I find it easier to be "liberated" about Pat's career path, knowing that wherever we move, I will be employable! Daughter Susan B. Anthony Somers-Willett is nearly six years old, and is naturally thrilled about the new \$1.00 coin named after her!

WILLIFORD, Jack & Nance (1973)  
263 Myers Cors Rd.  
Wappingers Falls, N.Y. 12590

Nance and I have been enjoying our little girl's growth (Jamie) and are anxiously awaiting the birth of our second child, due the end of July. We continue to wage the never-ending battle with all that needs to be done to increase the liveability of our home. (Actually, we are quite satisfied with all that's been accomplished.) Work has been far too straining during the past year and I'm therefore in the process of transferring "indispensability" to other individuals in the hopes of freeing myself for transfer to another department within IBM--I'm seriously considering management rather than technical work ("...out of the frying pan..."). All plans are tentative and quite postponed till the children are a minimum of about two years in age. We hope to find more travel time then, followed by possible relocation and career change (for Nance anyway). But that's all a ways off--till then we'll be in a simple middle-class life mode.

WOLF, Peggy (1974)  
1219 Ontario St.  
Lansing, MI 48915

In the last year I've learned to cross-country ski and to make window drapes. Pat and I put in a moderately large garden this spring, from which we hope to can a year's supply of tomatoes, corn, and possibly, beans and peas. I am slowly but inexorably being drawn into Pat's realm: computers, programming, and just recently, putting together an IMSAI 8080 kit. All of which would not, of course, be possible if I were working. After two and one-half years of being chief technologist at a clinical and research lab, working dreadful and long hours, furthering someone else's career more than my own, I am more than happy to not work, to catch up on personal life, serenity, etc.

WOLF, Patrick (1972)  
1219 Ontario Street  
Lansing, MI 48915

I have been occupied during the past year with my own business as a computer programmer/consultant. Work is done on microcomputer systems by Wang, IMSAI (8080) and Processor Technology (SOL). Packages written in BASIC for Payroll, Accounts Payable, Accounts Receivable, and Apartment Property Management. Business clients include a travel agency, a food wholesaler, a builder/realtor, a dentist, and an accounting firm. Currently Peggy and I are building our own home computer system from a kit.

YATES, Judy (1977)  
2484 High St.  
Palo Alto, CA 94301

I am in my third year of medical school at Stanford, keeping busy with various clinical rotations, and gradually learning some medicine. No residency plans as yet and no plans to change my marital status.

YOUNG, David F. (1977)  
450 Claremont Rd.  
Springfield, PA 19064

During the past year, I have been working towards the degree of Master of Science in Meteorology at Penn State University. I plan to graduate in the fall of this year after which I intend to either continue my studies for a Ph.D. or find a job in atmospheric research.

YOUNG, Michal (1975)  
3215 Rosedale Ave.  
Houston, TX 77004

This past year found me completing my medical studies at Howard University. As of July 1, 1979, I will be an intern at Grady Memorial Hospital in Atlanta, Georgia--an experience I am anxiously awaiting. My health is good, my spirit at peace with the universe and I look forward to the coming year.

YUMIBE, Susan Olney (1972)  
333 Eastside Avenue  
Ridgewood, N.J. 07450

After six years of working as an Investigator with the Food and Drug Administration in Los Angeles, San Juan, Puerto Rico, and New Jersey, I quit and returned to school. I just finished my first year at Rutgers Law School. This next year I will be working on a law school publication called Rutgers Journal of Computers, Technology, and the Law.

ZIETLOW, Mary K. (Beljan) (1975)  
26 Balance Rock Rd. Apt. 21  
Seymour, CT 06483

(continued)

My first year of marriage has been a great experience. David and I have had lots of fun setting up our apartment in Seymour, Connecticut. I also completed my first year at Yale working toward my Master's degree in Public Health. Summer of 1979 brought me back to Michigan for three months where I did an internship with Michigan Mid-South Health Systems Agency. I was responsible for establishing an Occupational Safety and Health Council for a six-county region. It was a terrific experience in working with people and watching the dynamics of group interactions. During the upcoming year I will be busy writing my master's essay based on my summer experience and looking forward to graduation in May 1980. I hope to work for a major corporation in an industrial safety or hygiene position.

Additions

BIEBER, Theodore R. (1977)  
4255 Rowanne Road  
Columbus, Ohio 43214

Last year I finished an M.A. in Higher Education Administration, worked as a graduate advisor in Holden Hall, and spent four weeks traveling in Europe. This year I will work as an assistant advisor in an MSU Residence Hall, continue my education at MSU.

BOYD, Timothy S. (1972)  
P.O. Box 352  
East Lansing, MI 48823

Just started as a Systems Analyst in the Department of Psychiatry in the College of Human Medicine at MSU. The work being done is in computer assistance in information gathering and analysis of human responses in social situations. Sailing on my Hobia and getting ready to start racing next year.

COBB, Luther (1974)  
2002 Portola Road  
Woodside, CA 94062

I spent most of last year doing my surgical internship at Stanford, but found some time off last summer for climbing in the Tetons and at Devil's Tower. I'm having a great time starting my surgical residency--I still am most interested in cardiovascular surgery. On days off I spend most of my time in my little house among some of California's most impressive redwoods. I've also started studying piano seriously again, so far with gratifying results.

COHN, Joseph Theodore (1973)  
RT. 6 Box 20  
Chapel Hill, N.C. 27514

Debbie and I are enjoying our third year in the "Southern Part of Heaven." I am completing my post-graduate training in family medicine and I am pondering options for next year (a fellowship, private practice, emergency room.) Aside from my usual resident's work I'm "moonlighting" in E.R.'s  
(continued)

around North Carolina, and working on several projects--finishing up on a study of the safety of home births, and starting a bioelectronic project of a computerized communication system for the profoundly handicapped. Hopefully, to be presented at the annual scientific congress of the AAFP. We enjoy seeing Mike and Sue Richmond who live nearby.

CREWSON, Catherine Joyce Turner (1975)  
8619 Whitehorn  
Romulus, MI 48174

Promotion to Service Director for Upjohn Healthcare Services in July 1979 (was Service Coordinator May 1976 to July 1979.) Vacated in California for three and one-half weeks--May 1979 and June 1979. Possibility of husband being transferred there September 1979.

ELLIOTT, Glen R. (1971)  
9609 Burgess Lane  
Silver Spring, MD 20901

I successfully survived my internship at Stanford, and Jan and I have just moved to the D.C. area. I'm going to be working for the Institute of Medicine in the National Academy of Sciences for about a year, mainly to learn administration. Should be exciting. No kids yet, but five years of happy marriage. Anybody in the area, feel free to drop by.

FITZGERALD, Dennis K. (1972)  
6908 100th Avenue  
Seabrook, Maryland 20801

Things haven't changed much for me and my wife (former Briggsie Nancy Beadles). I am continuing in my fifth year with Computer Sciences Corporation, helping with NASA's computer problems. I hope to take on a new project at NASA as System's Software Manager this fall (if we get the contract) and hope to receive my Master's Degree in May of next year. Nancy and I would be glad to hear from any of our friends and former classmates, especially any coming to the Washington D.C. area.

HERNANDEZ, Linda L. Welch (1974)  
1931 Boston S.E. #101  
Grand Rapids, MI 49506

This past year I have been very busy being an intern. I have not had time for much of anything else except the planning of my wedding this past June to Harry Hernandez of San Antonio, Texas. We spent a week in Acapulco for our honeymoon and now I'm settling back into the hospital routine. We don't have definite plans for this next year yet.

JAEGER, Mark F. (1973)  
1526 Spencer Street  
Lansing, MI 48915

My biggest work related accomplishment in the past year was the design and installation of an editing capability in the Michigan Medicaid Management Information System which allows more stringent monitoring of healthcare providers who have been known  
(continued)

to abuse Medicaid billing practices. Most of my spare time is spent showing our Miniature Schnauzers, two of whom have championship points and one which recently finished his Companion Dog Excellent (CDK) title. Last December I was Chairman of the First Licensed AKC Obedience Trial held by the Obedience Training Club of Greater Lansing, and I am currently Treasurer of that organization. Next May, I will be Chairman of the Ingham County Kennel Club's All-breed Dog Show and Obedience Trial.

LARKO, Donna Olson (1971)  
1724 Holiday Drive  
Niles, MI 49120

After being a chemist for so many years, I recently changed jobs and became the Employment Manager at the Mishawaka, Indiana, plant of Uniroyal, Inc. However I am still keeping my fingers in the field of chemistry by proctoring freshman chemistry labs at Indiana University, South Bend. The responsibilities of the employment job include any changes of salary and wage personnel at the plant. It is an extremely challenging position and very different from scientific endeavors. This summer my husband and I are taking a brief trip to Paris, France to visit relatives and experience the sights and sounds of that city.

OHM, Susan (1972)  
6105 Bridlington Cr.  
Austin, TX 78745

I am still working on my Ph.D. Next May I will graduate, get married to a Missourian, and turn 30. Have been eking out an existence on graduate student pay and currently looking for a job in Austin. Started sailing on blue lakes outside of Austin. Almost as pretty as Michigan lakes. Have taken up duplicate bridge and chess. I am also becoming a good ol' Texan--country western dancing. Anyone coming through Austin--call me. I also plan to be in Michigan next summer, hope to get by LBC while I'm there. Am interested in addresses of 1972 grads, and other people I know.

PAYNE, Frederick C. (1973)  
3226 W. Jolly  
Lansing, MI 48910

In the past six years I have completed a Master's in Limnology, worked for the DNR (Great Lakes Study) and have returned to complete my Ph.D. in Limnology. My research is on pressure and light effects on the growth of aquatic plants. I am about a year from completion after which I hope to secure a college teaching position. At that time Therese and I will likely be leaving the Lansing area.

PAYNE, Therese A. (Rine)(1973)  
3226 W. Jolly  
Lansing, MI 48910

During the summer of 1978 I finished my Master's in secondary school administration at MSU. I returned to my high school teaching position and applied and was selected for an Assistant Principalship.

(continued)

The Principalship is at an 8th-9th grade junior high. My main area of responsibility is discipline --attendance, budget and data processing. Fred and I still live in Lansing awaiting his degree completion.

ROBORDS, Alan C. (1973)  
3511 W. Shandon  
Midland, TX 79703

I am a member of A.A.P.G.; Society of Economic Geologists; and West Texas Geological Society. Plan to further my professional training.

SINGER, Cass L. (1975)  
1683 Broadway #204  
Ann Arbor, MI 48105

To one and all--Hi! The last year has been one of transition for me--new career, new city, new studies, and of course new people. And even though U of M is not (thank the fates) a "paper chase" it's still been a lot of work. I think I picked the right school for me, and that's always a key to learning; I just have to look around me to cure those few doubts I occasionally have about law as a profession. I haven't yet decided on a specialty, if any, although with my experience the environmental law field is a definite possibility. (In other words, I still haven't chosen a major since 1971!) So long, and best wishes to everyone.

BANDER, Paul G. (1977)  
Post Office Box 262  
Troy, MI 48099

Between my work and graduate school, I've been keeping pretty busy this year. With any luck, I'll be able to slip away to Hawaii later this summer (fingers crossed) for a little relaxation. I don't have any plans to move around until next fall when I graduate.

LIPP, Kathleen A. (Briody) (1974)  
6010 S. Highlands Avenue  
Madison, WI 53705

I spent the last year working for the State of Wisconsin's Legislative Council as a science writer/analyst. My main area of interest involved energy issues (tax credits for insulation, gasanol, time of day utility metering, etc.). Recently, I changed jobs and I now work for Wisconsin Power and Light, an electric and gas utility company. I am working in the conservation division on such projects as home energy audits and home solar energy use.

HOWARD, Margaret (Virch) (1971)  
School of Botany  
University of New South Wales  
P.O. Box 1  
Kensington, New South Wales 2033  
Australia

Margaret is finishing her Ph.D. in Botany at the University of Massachusetts and is spending this year doing fieldwork in Australia on a Fulbright Fellowship.

Some Notes From the Faculty

SANDY CONNER

Developing and administering our high school Visitation Day Program was certainly this year's professional highlight for me. It was very rewarding to see everyone in the LBC community working together to insure this program's success, and our guests were so delightful--it made our entire effort more than worthwhile.

My love of MSU football and basketball was more than rewarded, too. The trip to Ann Arbor last October for the Michigan-Michigan State game was a thrill--even when one viewed it from the end zone. Then came basketball season and ultimately a trip to Salt Lake City to see the Spartans win the NCAA final. It was an experience of a lifetime to be there and participate in the festivities. My husband and I also had an opportunity to travel around the Salt Lake area and enjoy the lovely mountain scenery.

In addition we managed a trip to Nassau in early March, and this summer are enjoying our summer cottage whenever we can find some spare time. In summary, it was a great year, and I am already looking forward to the 1979 football season and an MSU trip to the Rose Bowl!

JANE E. ELLIOTT

During my year of consultantship I served for one term as acting ombudsman for the University. This last year (1978-79) during my regular retirement I have been working half-time for LBC as an academic adviser which has kept me actively engaged with our students and faculty while still allowing me time to develop some latent hobbies.

RON HAMELINK

As I write this, my annual metamorphosis from mild-mannered university professor to country rustic, able to plow large fields in a single day, has already occurred. Looking back over the past academic year things from my perspective appear to be fairly constant. One first for Briggs was the senior seminar which Professor Hagerman and I teamed up for on American agriculture. Our class made two visits to working farms in the area, both rather large but still "family farm" operations. On the mathematics side I wish to report that the Fundamental Theorem of Calculus continues to enjoy a high level of confidence, whilst the non-countability of the reals is feeling some pressure. Stop around if you're in town.

JIM MC CLINTOCK

After a fascinating year teaching American literature and history at the University of Warsaw (U of W) in Poland, learning to love the people and hate the system, I am experiencing the delights of LBC with greater intensity than usual. Teaching a seminar centering on Pynchon's Gravity's Rainbow and the modern fiction course, too, have put me back in touch with the kinkier sides of our national obsessions; and teaching TCR has renewed my love affair with that strange combination of freshmen optimism and confusion. This summer of '79 I'll direct the Clarion Workshop of Science Fiction and Fantasy Writing whose real teachers will include Kate Wilhelm, Damon Knight, and Tom Disch, as well as other masters of the craft. Briggs remains a lively place, and I always look forward to those moments when an alum pops back into my life.

PAUL PARKER

The chem/physics course marches on (except for a few little stumbles here and there), and we continue to teach our attentive underclassmen many useful and practical things. Last June, we "graduated" our tenth chem/physics class. Diplomas were issued and refreshments were served. It was a stirring occasion but I fear we may have another tradition on our hands. I have managed to keep up a moderate research program in molecular vibration-rotation theory and have graduated one Ph.D. student (from Iran) and one M.S. student (from Dayton, Ohio). Both have returned home. Next fall will bring another eager crowd of freshmen. I can't wait to tell them all about the Physics Proficiency Examination. Best of everything to all of you!

RICHARD K. RABELER

I will be assisting in Briggs for yet another year come September. I am now preparing two papers for publication, one based on a talk given at the Michigan Academy meetings last March at Grand Valley State Colleges. I am looking forward to a summer of research to allow further progress on my studies toward a Ph.D. in plant systematics. Recent botanical expeditions include symposia at St. Louis, Missouri and field work in the Great Smoky Mountains and the Ozark Mountains.

DEAN RAY

A milestone has been reached by Lyman Briggs College and myself. For the first time in years the College is going to have to get along without this Dean. I am completing a doctoral degree in the Department of Fisheries and Wildlife sometime in early July and will be moving on to a new job. What and where is still to be decided. Although the task of finding a job is a little trying, the excitement of finishing what I set out to do twelve years ago is just about overwhelming. Eleven of those years I was with the biology program here in Briggs, and this last year I served as an academic adviser for the College. For me Briggs College has been an exceptional place to work, teach and learn. The friendships I have made among faculty, staff and students are of far greater value than the degree I am earning. I thank you all for what you have done for me.

H. ROBERTSON

H. Robertson with collaborators from MSU, Argonne National Laboratory and Atomic Energy of Canada, has been working for the past two years on an experiment designed to detect a new manifestation of the "weak force" in nuclei. The weak force was thought to be well understood for many years--it is the force which leads to  $\beta$ -radioactivity--but recent results from theory and from experiments at high energy particle accelerators indicate the presence of a new "neutral" component. The nuclear physics experiment is aimed at discovering whether this force acts in nuclei, as is expected on the basis of the new theory. If all goes according to plan, actual measurement should begin at Chalk River in northern Ontario sometime this summer.

Some Notes From the Faculty  
(continued)

CHARLES S. SCARBOROUGH

I am just completing my second full year as Assistant Dean of Lyman Briggs College. My greatest enjoyment in these two years besides attending meetings has been association with the Lyman Briggs College community. I find it most rewarding, sharing ideas with the students, faculty and staff of Lyman Briggs and aiding and assisting students in coping with the University. I am fairly certain that even though you hear of the diminishing quality of students and the quality of education, you will find that the quality of the Lyman Briggs student body and the education here remains at a very high level. I have enjoyed my two years here and even though I don't know all of you out there, I feel the spirit that you inspired lives on through the present group of students. I would also feel honored to meet any of you who may be passing through and drop in to see us.
